

# Jordan, CP3.X, EP, red and white, Paul, the pace of progress never stops!adidas Yeezy Boost 750 Blac

- Cheap Shoes Release 2017

---

just in the near end of the NBA season, the Losangeles clippers home guard Chris Paul (Chris Paul) on the foot of his latest generation of signature shoes Jordan CP3.X.

, come back, this unconsciously, CP3 basketball shoes series also came to the tenth generation. Can you still remember what it was like for the first time? If you've always been Chris, -, Paul's fan, or shoe buff, I'm sure you'll appreciate the constant change in this series of shoes.

The Air Jordan CP3 X EP Paul 10 red shoes, as the new color, or with the Air Jordan CP3 configuration X EP version, is still a continuation of the overall system is shock generation, but from the design, it is more attractive than the previous one to look.

One of the highlights of this

Air Jordan CP3 X EP is that the shoe side is like a star track shoe body support system, and a unique lacing system makes the entire pair of shoes faster.

Air, Jordan, CP3, EP, X, there is a big bright spot, is the use of Flyweave materials, this previously more in the Air Jordan generation is used in high-end materials, and finally in the flagship cost-effective shoes in the use of.

again, to support, CP3 series of shoes has always been regarded as a guard shoes in both the speed and support of the classic.

, do you remember the bottom pack of the Jordan CP3.VIII TPU? In the tenth generation, the more abnormal upgrade, probably a vamp wrapped up, and the star of the rail support, is actually the fly line, tongue, laces and configuration of the system together with the full range of shoelace tightening, the pressure will be firmly locked good foot.

but for a broad foot friend, these shoes might be a little expensive to wear. Xiao Bian recommend you choose more than half yards to buy, so that the neckline space will be more, penetration is also more convenient.

shoes use Ortholite insoles, and also add unique graffiti patterns, in addition to enhancing the comfort and perspiration effect, the beauty is also very first-class.

in addition, although it is in the shoe design, but shoes unique lacing system greatly bound foot sliding in the shoes, through the still feel very comfortable, and Flyweave vamp after two pairs of Air Jordan is the generation of practical argument, there is no doubt comfort.

it is visible that the star like support extends all the way to the heel, and there is no support.

has adopted since the previous generation JiuGongTu format forefoot Zoom Air air cushion, the re emergence of. Although there is not much innovation in the form, it also explains Jordan Brand's letter for this slow vibration configuration >

Following the highly demanded Grey colorway of the adidas Yeezy 750 Boost, an upcoming adidas Yeezy 750 Boost Black colorway has already been confirmed by Kanye West.

Kanye first broke the news on a New York radio Power 105.1 Breakfast Club, that a Black version of the Yeezy 750 would hit the market soon, and some are projecting it to drop as early as this Fall/Winter 2015.

There has been no word on how Ye and adidas would use the shade of Black onto the sneaker, but here are detailed photos of how exactly the adidas Yeezy 750 Boost Black colorway will look like. The shoe sports an all-Black suede upper that was originally seen with a White boost sole, but the release version could be a fully Blackout colorway as seen below.
